JT | Schaeffler
Commitment and future

JT, the SMART collaborative data format for 3D modelling, enabling efficient collaboration and precise visualization, with different applications and various industries. It revolutionizes workflows and promotes a SMARTer future.

We pioneer motion
Motion is a key factor for successfully meeting our global challenges. Our success will depend largely on our ability to rethink and produce pioneering solutions for motion and mobility.

THE MOTION TECHNOLOGY COMPANY

~84,000 employees worldwide
~200 locations in ~50 countries
83 plants and 20 R&D centers
We want to shape the future of motion in cooperation with our customers, partners, and society. That is what drives us and expresses our identity. Motion is a key factor for successfully meeting our global challenges.

We have identified Innovation, Agility, and Efficiency as three strategic dimensions that are particularly critical for success to collaborate with our partners.
impressive JT figures at Schaeffler

JT | Schaeffler Commitment and future

IMPRESSIONE
JT FIGURES AT SCHAFFLER

The number of 9,192,715 JT files stored in SAP shows up as a remarkable milestone. Additionally, the number of 48,722 JT files generated during the 3D Master process represents an impressive metric. These numbers reflect impressive achievements and progress towards collaboration.
COLLABORATION IN THE AGILE WORLD

Our intuitive methods and tools will guide product developers through their processes. This will allow them to concentrate on their core competences while managing product and project complexity.
The company benefits from adopting a SMART collaborative data format, as it streamlines communication and collaboration among teams and partners, leading to increased productivity and faster decision-making. Additionally, a SMART lightweight format and compatibility with various software applications result in cost savings through reduced physical prototyping and more efficient data exchange processes.
