JT – The Multi-Disciplinary 3D Backbone for the Digital Enterprise

- Interdisciplinary process covered by multiple vendors
- Demonstration of the cross-vendor capabilities

Use of JT in multiple steps of product development and beyond

Steps to be shown

Storyboard & Demonstrations

Aim of vendor track:

- Demonstrate multi-vendor collaboration scenarios using JT
- From requirements specification, through design in context to additive manufacturing
- Using LEGO model

Message:

- JT is a successful industry interchange format for the whole life-cycle
